The User Interface Specification Document of The Project

20 Mart 2022

Requirements

- The user role of the manager in the User Management Screen must be admin or super admin to use the system.
- The user must have a laptop or a computer that is in good condition to be used when using the application.
- The user that has a role of admin or super admin shall be able to create a new user.
- The user that has a role of admin or super admin shall be able to list the user, and also, the manager shall be able to list these users by hiding disabled users.

Details related to UI components

1. **New User button:** To create a new user, the button must be pressed. After the step, the form must be filled with the user's information.
2. **Save User button:** To save the new user's data to the system, the button should be used after filling out the form.
3. **Hide Disabled User button:** The button is to hide disabled users in the users list.

4. **The selection for listing (ID, User Name, Email, Enabled):** In the list, there are sections such as ID, User Name, Email, Enabled. In these sections' part, there is a symbol that changes the listing way. For example; if the symbol in the ID part is clicked, user IDs will be sorted in descending order.
5. **The form:** The form includes information as listed below.
 - a. Username
 - b. Display Name
 - c. Phone
 - d. Email
 - e. User Roles(Guest, Admin, SuperAdmin)
 - f. Enabled

According to the user to be added, this information must be filled in completely.

Page Specifications

This page is used by admins and super admins for user management purposes. It has features to add a new user or unblock the user or block the user.

1. At the beginning

If the user with admin role logs into the system, there will be a list of members in the database on the left of the page.

2. Pressing the New User button

When the user with admin role presses the New User button, there will be an empty form on the right of the page. The form must be filled in completely for the creation of the new user.

3. Pressing the Save User button

When the user with admin role presses the Save User button, the filled form will be saved to the database and the form will disappear. And, in the left user list, the newly added user information will be displayed.
